« **Analyzing the diverse impact of digital use
on the job quality.**

**Comparing work organization and
job satisfaction in Japan and France»**

What is the impact of digitalization on job quality? While the literature has mainly focused on the effects on performance and volume of employment, it has relatively neglected the qualitative issues, including when the existence of a digital divide is discussed. This paper tries to fill the gap through a comparative analysis of the diverse impacts of digital use on work organization and job satisfaction in Japan and France;
